

Fleet Suite Management System (FSMS)

FSMS is the complete solution to run any size of Fleet business. This Cloud and Mobile based solution enables dispatchers to manage fleet, drivers, deliveries, documents and track the entire operation seamlessly.

Know everything about Fleet Suite

End-to-End Customization

We specialize in customizing our app suite to precisely fit your needs

In-House Support

We handle implementation and provide in-house support for seamless integration and ongoing assistance.

Scalable Cloud Solutions

With our tailored approach, you can confidently scale your operations while enjoying the reliability and efficiency of cloud technology.

Delivery Management

Ability to schedule deliveries based on customer requests and driver availability

Scanning Technology

Advanced scanning feature to capture BOL, delivery ticket and other documents

Live and Scheduled Dispatch

Supports both live dispatches and scheduled dispatches to run the fleets off hours

Reporting

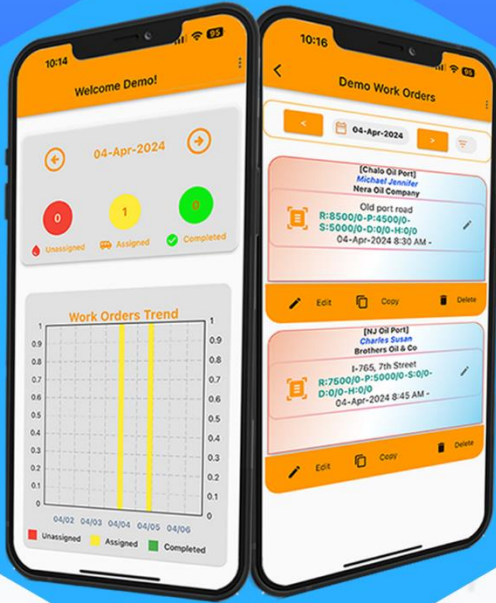

Provides reporting capabilities, including delivery status, driver performance, and inventory levels

Delivery Details

Displays details about the delivery, including the type and amount of fuel to be delivered, the delivery location, and any special instructions

Split Order Support

Two or more fuel types in single order and can be tracked individually

Dispatcher & Driver Mobile Apps

Explore the robust features of our mobile app tailored for managing and tracking orders effortlessly. Plus, our dedicated app for drivers offers specialized tools to streamline order handling.

Work Order Management

Ability to view and manage assigned work orders, can able to see order details, customer information, delivery instruction and prioritize their tasks.

Delivery Status Update

Drivers can update the app with the status of their deliveries. Work orders can mark as "Unassigned", "Assigned" or "Completed" to keep the company informed about the progress.

Live and Scheduled Dispatch
